

INNOVATIVE THINKING...BOTTOM LINE RESULTS!

Applying Technology to Transportation Challenges

Paul Gibbs, President:

“We simply applied common sense to a few particularly inefficient loading and unloading situations, and then made the investment to engineer solutions. Because they address and solve so many domestic and international loading problems, they can bring a shipper and receiver instant savings through more efficient freight loading and unloading, and enable shipping through a conventional manner without the need for special equipment.”

Domestic Transportation

Innovative Transport Solutions offers very competitive trucking rates nationwide for both air and ocean freight shipments covering the following:

Less-Than-Truckload (LTL)

Full-Truckload (FTL)

Full-Container (FCL)

Flat Bed

Break-Bulk shipments requiring Flat beds, Step Decks, Low boys & Double Drops

Auto transportation of high value cars

Special projects

We offer quick turn-around times on our rate quotes, updates (in real-time) on when the freight is picked-up and delivered and PODs are supplied within 24 hours of delivery.

Our goal is to provide quality logistics services for your organization - competitive rates, excellent customer service and most importantly execution. We stand by our commitments!
