INNOVATIVE THINKING....BOTTOM LINE RESULTS!

Applying Technology to Transportation Challenges

Paul Gibbs, President:

"We simply applied common sense to a few particularly inefficient loading and unloading situations, and then made the investment to engineer solutions. Because they address and solve so many domestic and international loading problems, they can bring a shipper and receiver instant savings through more efficient freight loading and unloading, and enable shipping through a conventional manner without the need for special equipment."

INNOVATIVE THINKING....BOTTOM LINE RESULTS!

Domestic Transportation

Innovative Transport Solutions offers very competitive trucking rates nationwide for both air and ocean freight shipments covering the following:

Less-Than-Truckload (LTL)
Full-Truckload (FTL)
Full-Container (FCL)
Flat Bed
Break-Bulk shipments requiring Flat beds, Step Decks, Low boys & Double Drops
Auto transportation of high value cars
Special projects

We offer quick turn-around times on our rate quotes, updates (in real-time) on when the freight is picked-up and delivered and PODs are supplied within 24 hours of delivery.

Our goal is to provide quality logistics services for your organization - competitive rates, excellent customer service and most importantly execution. We stand by our commitments!
